Physician Relationship Technology

Turn Doctor Data into Dollars

Let the leader in physician recruiting and relationship intelligence software help develop your most valuable asset—your medical staff.

Web-based **KontactIntelligence (Ki)** is the most comprehensive and strategic technology application of its kind specifically designed to maximize your medical staff assets.

From recruiting to retaining your top performers, Ki generated reports will afford you the security of having your finger on the pulse of all of your medical staff issues and growth opportunities.

And it's easy. Imagine having access to layers of data that overlay so you can connect the dots to find untapped business opportunities. Ki can even help monitor your competitors' activity.

Ki enables you to:

- recruit faster & smarter

- build physician relationships & referrals

- monitor productivity outliers

- secure marketshare
