

One form. One **time**. Online.

According to physician satisfaction surveys, filling out hospital and payor information forms is at the top of the list of dissatisfiers for doctors. "How many times can they ask me where I went to school?" one disgruntled doc commented. Don't forget, retention begins during this onboarding experience. First impressions count!

KiOnBoarding, designed and customized specifically for each client, includes a provider profile, onboarding check lists, and a hospital and payor online "super" application which automates the entire online onboarding process. User-friendly to both you and your physician or advanced practice provider, this web-based **Ki** onboarding solution is easy to deploy, completely customizable, and will streamline your onboarding and application processes.

With **KiOnBoarding** you can even introduce your onboarding team so your new physician can easily see who will be helping them get started. Introductions to marketing, hospital credentialing, payor credentialing, administration and leadership, and even valued community connections are very important to getting your new physician off to a great start!

Now your new physician can log-in to their private secured portal to complete their Profile and Application from anywhere, any time. With their online Profile and Application prepopulated, all they need to do is review the information you have
