already collected, edit or correct, or add missing information making the process faster and improving physician satisfaction. No more filling out hospital credentialing applications or marketing profiles by hand. **KiOnBoarding** also allows the physician to submit all the information needed for those tedious payor contracts.

Your new physician can log-in as many times as they wish to complete the application whenever they want from any computer or a mobile device like their iPhone or iPad. Just think about how much faster you will be able to get this work done!

KiOnBoarding application will help centralize the physician's data where the medical staff office, human resources, and the payor credentialing and marketing will have all the information needed in order to complete all other forms required. It is designed to easily interface with your existing hospital privileging and HR systems via web-services so departments can quickly get the information they need, the way they want it.

KiOnBoarding is also ideal for health systems seeking to standardize the application process without the need to change legacy credentialing technology platforms even if they are using different systems at all of their hospitals. From within your KontactIntelligence software application, in addition to status reporting, you can manage all your communications with the provider and the other departments involved in your onboarding process.

To learn more about how **KiOnBoarding** helps save time and makes this complex and arduous task easier and faster for both you and your new physician, call us. **888.550.0556**.

First impressions count.
